Agrément Certificate

86/1671

Product Sheet 3

ALUMASC RAINWATER SYSTEMS

ALUMASC GX JOGGLE, SMOOTH, MOULDED GUTTER SYSTEMS

This Agrément Certificate Product Sheet⁽¹⁾ relates to Alumasc GX Joggle, Smooth, Moulded Gutter Systems, mill-finished or polyester-coated aluminium eaves guttering for conveying rainwater from roofs.

(1) Hereinafter referred to as 'Certificate'.

CERTIFICATION INCLUDES:

- factors relating to compliance with Building Regulations where applicable
- factors relating to additional non-regulatory information where applicable
- independently verified technical specification
- assessment criteria and technical investigations
- design considerations
- installation guidance
- regular surveillance of production
- formal three-yearly review.

KEY FACTORS ASSESSED

Performance of joints — joints between gutter sections and fittings are watertight under conditions of thermal movement in excess of those expected to occur in practice (see section 6).

Resistance to loading — gutters have adequate resistance to snow loading (see section 7).

Durability — the systems will have a life expectancy of 40 years in rural and suburban conditions and 25 years in industrial and coastal conditions (see section 10).

The BBA has awarded this Certificate to the company named above for the systems described herein. These systems has been assessed by the BBA as being fit for their intended use provided they are installed, used and maintained as set out in this Certificate.

On behalf of the British Board of Agrément

Date of Third issue: 28 September 2020

Originally certificated on 28 November 1988

Hardy Giesler
Chief Executive Officer

The BBA is a UKAS accredited certification body – Number 113.

The schedule of the current scope of accreditation for product certification is available in pdf format via the UKAS link on the BBA website at www.bbacerts.co.uk

Readers MUST check the validity and latest issue number of this Agrément Certificate by either referring to the BBA website or contacting the BBA directly.

Regulations

In the opinion of the BBA, Alumasc GX Joggle, Smooth, Moulded Gutter Systems, if installed, used and maintained in accordance with this Certificate, can satisfy or contribute to satisfying the relevant requirements of the following Building Regulations (the presence of a UK map indicates that the subject is related to the Building Regulations in the region or regions of the UK depicted):

The Building Regulations 2010 (England and Wales) (as amended)

Requirement:	H3	Rainwater drainage
Comment:		See section 8 of this Certificate.
Regulation:	7(1)	Materials and workmanship
Comment:		The systems are acceptable. See section 10 and the <i>Installation</i> part of this Certificate.

The Building (Scotland) Regulations 2004 (as amended)

Regulation:	8(1)(2)	Durability, workmanship and fitness of materials
Comment:		The systems can contribute to a construction satisfying this Regulation. See sections 9 and 10 and the <i>Installation</i> part of this Certificate.
Regulation:	9	Building standards applicable to construction
Standard:	3.6	Surface water drainage
Comment:		The systems can satisfy the relevant requirements of this Standard. See section 8 of this Certificate.

The Building Regulations (Northern Ireland) 2012 (as amended)

Regulation:	23	Fitness of materials and workmanship
Comment:		The systems are acceptable. See section 10 and the <i>Installation</i> part of this Certificate.
Regulation:	82	Rainwater drainage
Comment:		See section 8 of this Certificate.

Construction (Design and Management) Regulations 2015

Construction (Design and Management) Regulations (Northern Ireland) 2016

Information in this Certificate may assist the client, designer (including Principal Designer) and contractor (including Principal Contractor) to address their obligations under these Regulations.

Additional Information

NHBC Standards 2020

In the opinion of the BBA, Alumasc GX Joggle, Smooth, Moulded Gutter Systems, if installed, used and maintained in accordance with this Certificate, can satisfy or contribute to satisfying the relevant requirements in relation to *NHBC Standards*, Part 7 *Roofs* (Chapters 7.1.12 and 7.2.22).

Technical Specification

1 Description

1.1 Alumasc GX Joggle, Smooth, Moulded Gutter Systems are available in a range of sizes and comprise the items listed in Tables 1 and 2.

Screws 5	251	BS EN 1301 ⁽⁶⁾

(1) Parts 1 to 4.

(2) Parts 1 to 3.

(3) Parts 1 to 3 and 7.

(4) Parts 1 and 2.

(5) Parts 1 and 4.

(6) Parts 1 to 3.

1.4 Downpipes are extruded and are bought in to the required specification. Downpipe fittings are cast and extruded; screws, nuts, washers and other accessories are bought in to the required specification and supplied as required.

1.5 The gutter sections are butt jointed and overlapped by a 76 mm wide internal or external union clip. A 4 mm wide gap is left between each section. Slots may be provided for fixing with screws, nuts and washers. Each joint is sealed using a suitable silicone sealant⁽¹⁾.

(1) External union clips are available on request.

1.6 Brackets and top straps are formed from wrought or pressed aluminium.

2 Manufacture

2.1 The products are manufactured from aluminium, and powder coated to BS EN 12206-1 : 2004, if required.

2.2 As part of the assessment and ongoing surveillance of product quality, the BBA has:

- agreed with the manufacturer the quality control procedures and product testing to be undertaken
- assessed and agreed the quality control operated over batches of incoming materials
- monitored the production process and verified that it is in accordance with the documented process
- evaluated the process for management of nonconformities
- checked that equipment has been properly tested and calibrated
- undertaken to carry out the above measures on a regular basis through a surveillance process, to verify that the specifications and quality control operated by the manufacturer are being maintained.

2.3 The management system of Alumasc Building Products Ltd has been assessed and registered as meeting the requirements of BS EN ISO 9001 : 2015 by Centre for Assessment Ltd (Certificate 02/1832).

3 Delivery and site handling

3.1 Mill-finished gutters, downpipes and fittings are delivered to site unprotected, and coated components are wrapped in polythene. Reasonable care should be taken to avoid damage during storage, handling and installation.

3.2 In accordance with normal good practice, the components should be stored under cover and away from the risk of impact and the effects of weather.

Assessment and Technical Investigations

The following is a summary of the assessment and technical investigations carried out on Alumasc GX Joggle, Smooth, Moulded Gutter Systems.

Design Considerations

4 General

Alumasc GX Joggle, Smooth, Moulded Gutter Systems are satisfactory for use as eaves guttering for conveying rainwater from roofs.

5 Practicability of installation

The systems are designed to be installed by a competent general builder, or a contractor, experienced with this type of system.

6 Performance of joints

Correctly made joints between adjacent gutter sections, and between gutter sections and fittings, are watertight under conditions of thermal movement in excess of those expected to occur in practice.

7 Resistance to loading

The systems have adequate resistance to impacts and snow, water and other loads likely to occur during and after installation.

8 Flow characteristics

The flow capacities, when calculated in accordance with BS EN 12056-3 : 2000, are given in Table 5 of this Certificate.

Table 5 Freeflow capacities⁽¹⁾

Box gutter	Flow capacity (l·s ⁻¹)
100 x 75 mm (4" x 3")	2.18
125 x 100 mm (5" x 4")	4.28
150 x 100 mm (6" x 4")	5.16

(1) The flow capacity of downpipes can be found in Table 8 in BS EN 12056-3 : 2000.

9 Maintenance

9.1 The systems can be supplied uncoated or painted as required.

9.2 The gutters can be cleared easily of debris.

9.3 Damaged sections may be removed and replaced.

10 Durability

In the opinion of the BBA, the gutter system will have a minimum maintenance-free life of 40 years in rural and suburban conditions and 25 years in industrial and coastal conditions. However, when in contact with some materials, corrosion may occur (see sections 12.2 and 12.3).

11 Reuse and recyclability

The systems components contain polyester coated aluminium, which can be recycled.

Installation

12 General

12.1 Installation must be carried out in accordance with the Certificate holder's instructions, and BS EN 12056-3 : 2000 where applicable.

12.2 The guttering system will be corroded by contact with copper, or water run-off from copper, in any environment and should not be installed on a building with a copper roof and other contacts with copper and its alloys should be avoided.

12.3 The contact areas should be coated with bitumen paint if the product will be:

- embedded in concrete or mortar, or
- in contact with lead or stainless steel in a marine environment.

13 Procedure

13.1 The rafter and fascia bracket supports for the gutters should be fitted using No 12 by 38 mm zinc-plated, cadmium plated or sherardized screws as detailed in Table 6.

Table 6 Details of screws

System	Screw head type	Centres (maximum) (mm)
GX Joggle	roundhead	1000
GX Smooth	roundhead	1000
GX Moulded	roundhead	600

13.2 To make the joint watertight, sufficient suitable silicone sealant should be applied between the spigot and socket onto clean and dry surfaces so that some of the sealant is squeezed out of the joint as the pieces are brought together. The excess sealant should be removed and the surrounding area cleaned. Aluminium nuts and bolts should be bedded in sealant (the head covered but the nut visible).

13.3 The aluminium screws, nuts and washers are fitted using the overlapping slots in the gutter lengths and the union clips; overtightening should be avoided.

13.4 If the gutter has to be trimmed to length, it can be cut with normal metalworking tools. Slots must then be formed to match the socket to which the gutter is to be fixed.

13.5 Circular downpipes are supplied with loose drive-fit sockets; square and rectangular cross-section downpipes have welded sockets. If a watertight joint is required, sealant should be applied to the lower part of the socket, and the pipe pushed home. The pipe socket should then be packed with suitable caulking, eg polyethylene foam, and a small bead of sealant introduced at the top of the joint.

13.6 Two-part square and rectangular section offsets are available which can be cut to the required length on site.

Minimum projections are:

- 105 mm (72 by 72 mm and 107 by 76 mm offsets)
- 125 mm (102 by 102 mm offsets).

Technical Investigations

14 Tests

Tests were conducted and the results assessed to determine:

- resistance of brackets to 200 kg load
- resistance of gutter to loading
- dimensional accuracy
- watertightness of joints
- flow capacity
- resistance to impact and loading
- ease of cleaning
- thermal movement.

15 Investigations

15.1 The manufacturing process was evaluated, including the methods adopted for quality control, and details were obtained of the quality and composition of the materials used.

15.2 Site visits were carried out to assess the practicability of installation and the performance in use.

16 Conditions

16.1 This Certificate:

- relates only to the product/system that is named and described on the front page
- is issued only to the company, firm, organisation or person named on the front page – no other company, firm, organisation or person may hold or claim that this Certificate has been issued to them
- is valid only within the UK
- has to be read, considered and used as a whole document – it may be misleading and will be incomplete to be selective
- is copyright of the BBA
- is subject to English Law.

16.2 Publications, documents, specifications, legislation, regulations, standards and the like referenced in this Certificate are those that were current and/or deemed relevant by the BBA at the date of issue or reissue of this Certificate.

16.3 This Certificate will remain valid for an unlimited period provided that the product/system and its manufacture and/or fabrication, including all related and relevant parts and processes thereof:

- are maintained at or above the levels which have been assessed and found to be satisfactory by the BBA
- continue to be checked as and when deemed appropriate by the BBA under arrangements that it will determine
- are reviewed by the BBA as and when it considers appropriate.

16.4 The BBA has used due skill, care and diligence in preparing this Certificate, but no warranty is provided.

16.5 In issuing this Certificate the BBA is not responsible and is excluded from any liability to any company, firm, organisation or person, for any matters arising directly or indirectly from:

- the presence or absence of any patent, intellectual property or similar rights subsisting in the product/system or any other product/system
- the right of the Certificate holder to manufacture, supply, install, maintain or market the product/system
- actual installations of the product/system, including their nature, design, methods, performance, workmanship and maintenance
- any works and constructions in which the product/system is installed, including their nature, design, methods, performance, workmanship and maintenance
- any loss or damage, including personal injury, howsoever caused by the product/system, including its manufacture, supply, installation, use, maintenance and removal
- any claims by the manufacturer relating to CE marking.

16.6 Any information relating to the manufacture, supply, installation, use, maintenance and removal of this product/system which is contained or referred to in this Certificate is the minimum required to be met when the product/system is manufactured, supplied, installed, used, maintained and removed. It does not purport in any way to restate the requirements of the Health and Safety at Work etc. Act 1974, or of any other statutory, common law or other duty which may exist at the date of issue or reissue of this Certificate; nor is conformity with such information to be taken as satisfying the requirements of the 1974 Act or of any statutory, common law or other duty of care.
